

Outreach

As the AALO mission statement says, it is our goal to strengthen and enhance the community. AALO works to determine which barriers exist in the communities that we serve and to insure that opportunities are available for all residents to obtain health services, education, housing, employment and financial stability. We believe we should encourage and provide the opportunity for residents to participate in community planning and the political process.

Our approach:

- Insure that individuals and families we work with are directed to services and receive them in a manner that is courteous, respectful and helpful.
- Work with partners in the community to develop opportunities for housing, employment, education, health, family services and financial resources for families and individuals at-risk and in need of services.
- Assist and encourage individuals to participate in local, state and national organizations/groups and have a voice about the quality of services/resources in their communities.

Advocate for equal rights and opportunities for all members of the community and increase awareness of community problems and issues to ensure that all residents are aware of needs and have the opportunity to participate in solutions to community.

For more information contact us at info@sfvaalo.org

Community Outreach Workers hold periodic workshops as well as participate in a wide variety of community events. Workshops cover a wide range of issues including:

- Rights and Responsibilities
- Skill Building/Self Sufficiency
- Nutrition Education
- Community Resources
- Employment Readiness/Resources
