Juanita Arvizu

April 30, 2015

Juanita G. Arvizu, R.N., MPH, CHES, FCN has been with Mission City Community Network for over 20 years. Her last day of work was today and a few of the BIH staff members made a trip to the corporate office to say good-bye and best wishes!

Juanita certainly has an impressive list of academic and professional credentials but what BIH likes most about her is her dedication to the community and those who are most in need. What a kind and compassionate person who demonstrates her caring by thought, word and deed.

BIH fondly remembers that about five years ago we shared a table with Juanita at a MCCN holiday party. During the course of conversation we related information about a family who was homeless and staying in a local motel. They could not pay for additional days and were about to lose their room just around Christmas. As we were leaving the event, Juanita quietly came up to us and handed over a check to extend their stay at the motel thru the holidays! What a heart. We know that Juanita and her husband, Bob, will continue to give back to the community.

With corporate office staff members.
